

## Beta - Beta Urban 125-200 - \_08 service manual

### 1URBAN 125/200cc

Thank you for your confidence and have fun. With this booklet we wanted to give you the information necessary for a correct use and good maintenance of your motorcycle.

The data and characteristics indicated in this manual do not bind BETAMOTOR S.p.A, which reserves the right to make changes and improvements to its models at any time and without notice.

### 2WARNING

It is recommended, after the first or second hour of off-road use, to check all tightening torques, paying particular attention to:

- sprocket
- footrest supports
- front brake caliper
- rear brake caliper
- license plate holder
- handlebar risers
- engine bolts
- shock absorber bolts
- wheel spokes
- rear subframe
- plastic fixings

### WARNING

In case of work to be carried out on the motorcycle, contact the authorized Betamotor service network.

5USAGE WARNINGS	
The vehicle must be equipped with: license plate, registration certificate, road tax and insurance.	

It is forbidden to transport animals and objects not secured to the vehicle, which protrude from the vehicle's overall dimensions and which exceed the load specified by the Manufacturer.

The helmet is mandatory.

Travel with dipped headlights always on.

Modifications to the engine or other components that may cause an increase in power and therefore speed, are punishable by law with severe penalties, including confiscation of the vehicle.

To safeguard your life and that of others, drive with caution and always wear a safety helmet and dipped headlights on at all times.

### ATTENTION:

Modifications and tampering during the warranty period release the Manufacturer from any liability and invalidate the warranty itself.

### ECOLOGICAL DRIVING

Each vehicle with an internal combustion engine produces more or less noise (noise pollution) and more or less (air pollution) depending on the type of driving adopted.

Reducing these conditions as much as possible is now a duty for everyone, therefore avoid full throttle starts, sudden and unnecessary accelerations and sudden and equally unnecessary braking, thus limiting noise, premature wear of tires and mechanical parts of the vehicle and saving significantly on fuel consumption.

### 6SAFE DRIVING

Respect the Highway Code

Always wear an approved and fastened helmet

Always keep the protective visor clean

Wear clothes without dangling ends

Do not travel with sharp or fragile objects in your pocket

Adjust the rear-view mirror correctly

Always drive seated with both hands on the handlebars and feet on the footrests

Never get distracted or be distracted while driving

Do not eat, drink, smoke, use your mobile phone, etc... while driving

Do not listen to music in "headphones" while driving

Never travel paired with other vehicles

Do not tow or be towed by other vehicles

Always keep a safe distance

Travel with dipped headlights on even during the day

Do not stand sitting on the vehicle on the stand

Do not start with the vehicle on the stand

Do not extract the stand with the front/march of the vehicle downhill

Wheelies, serpentines, swaying, are very dangerous for you, for others and for your vehicle

On dry roads without gravel or sand, use both brakes, one alone can cause dangerous and uncontrollable skidding

In case of braking, use both brakes, thus obtaining a stop of the vehicle in shorter spaces

On wet roads, drive with caution and at moderate speed: use the brakes with greater sensitivity

Do not start the engine in enclosed spaces.
