**\*\*FOREWORD.\*\***

It has always been our aim to construct A.J.S. Motor Cycles on such simple and straightforward lines that their management, running and upkeep shall present no difficulties, even to the motor cyclist with little or no previous experience.

Complications in the way of design have always been studiously avoided; and this little booklet is intended to render the owner familiar with the salient features of the 3.49 h.p. A.J.S., and so enable him to get the best out of his machine.

The information given in the following pages has been very carefully compiled in the hope that it will prove of assistance to the rider in keeping his machine in the best possible condition, and aid him in elucidating any little difficulties which may arise from time to time.

The reader's attention is specially drawn to the pages detailed to \*Driving Instructions and General Care of the Machine\*, and particularly to those parts of the instructions which are \*emphasised by being printed in italics\*.

A copy of this booklet is supplied free with every new 3.49 h.p. A.J.S. Motor Cycle. Applications for extra copies must be accompanied in every case by a remittance for 6d. to cover cost and postage.
