PRESENTATION

Welcome to the Husqvarna motorcycling Family! Your new Husqvarna motorcycle is designed and manufactured to be the finest in its field. The instructions in this book have been prepared to provide a simple and understandable guide for your motorcycles operation and care. Follow the instructions carefully to obtain maximum performance and your personal motorcycling pleasure. Your owners manual contains instructions for owner care and maintenance. Information covering repair of major units such as engine, transmission, etc. is provided in the Husqvarna Service Manual.

The information concerning details or main work of repair or maintenance are described in the Husqvarna Service Manual. This manual is available upon request by stating the code number set on pages 262, 264, 266. Work of this kind requires the attention of a skilled mechanic and the use of special tools and equipment. Your Husqvarna dealer has the facilities, experience and original parts necessary to properly render this valuable service. This Owners Manual and the Purchase Registration Booklet are parts and parcels of the motorcycle, hence, they have to remain with the motorcycle even when sold to another user. This motorcycle uses components designed thanks to systems and state of the art technologies which are thereafter tested in competition. In competition motorcycles, every detail is verified after each race in order to always guarantee better performance. For correct functioning of the vehicle, it is necessary to follow the maintenance and control table found on page 286-292.

IMPORTANT NOTICES

1) The TE and TC models are guaranteed COMPETITION motorcycles exempt from functional defects, the suggested maintenance table for competition use is shown on page 2
