PREMISE

This workshop manual includes the main electro/mechanical checks, the indispensable controls and the assembly of loose components supplied, to carry out the delivery of the new factory motorcycle (the sequence of operations is not binding).

It is very important to adhere scrupulously to what is described. Interventions that are superficially performed or even omitted, can generate personal damage to the purchaser, to the motorcycle, etc... or produce, in the simplest of hypotheses, unpleasant disputes.

Tempari (intervention times for operations during the guarantee period).

FOREWORD

This workshop manual contains instructions for the basic electrical/magnetic controls, essential checks, and the assembly of separately supplied components for the delivery of the brand new motorcycle (the order of operations is not binding).

It is very important that the instructions are followed exactly. Superficially performed or even omitted interventions can lead to personal injury for the buyer, damage to the motorcycle, etc., or at best to unpleasant complaints.

Tempari (intervention time for operations during the warranty period).

PREAMBLE

The present warehouse manual includes all main electro-mechanical tests, indispensable controls and assembling of loose supplied spare parts in order to carry out delivery of this brand new motorbike (the sequence of operations to be carried out is not a difficult one).

It is very important to carefully observe what described herewith. Interventions, which are superficially carried out, or even omitted, can cause injuries to buyer, damages to the motorbike, etc. or most probably, unpleasant disputes.

Tempari (intervention time for operations carried out within the duration of guarantee)

AVANT-PROPOS

The information contained in this workshop manual concerns the main checks on the electrical and mechanical parts, the indispensable checks, and the assembly of components supplied separately, to be carried out before delivering the new scooter (it is not obligatory to respect the sequence of operations as it is presented).

It is very important to scrupulously observe the instructions. Interventions carried out superficially or omitted, can prejudice the buyer, damage the scooter, etc... or lead, in the best of hypotheses, to unpleasant disputes.

Profils temporels (intervention times for carrying out operations during the warranty period).

INTRODUCTION

This workshop manual provides information concerning the main interventions of an electrical/mechanical type, the indispensable controls and the assembly of the components that are supplied separately, to carry out the delivery of the new factory vehicle (the sequence of operations is not obligatory).

BL Motorcycles Ltd

Professional Workshop Manual - English Translation

It is very important to scrupulously observe what is indicated in the booklet. Performing the interventions in a superficial manner or even forgetting to perform them, can cause damage to the buyer, to the motor vehicle, etc or cause, in the simplest of cases, unpleasant complaints.

Esquemas de tiempos (working times for operations during the warranty period).
