A word to the buyer. Your moped is a product manufactured using professional equipment from high-quality components. Equipped with an electronic ignition system, an electric starter, and its consumer properties are at the level of leading world manufacturers - an economical engine, low noise level, good acceleration dynamics and excellent handling. All these qualities are combined so that your moped becomes a high-tech and convenient conqueror of urban roads. This instruction provides detailed information about your moped - how to properly ride and service it.

The manufacturer hopes for your understanding regarding the possible discrepancy between the illustrations in this instruction and the actual moped; this is due to the constant modernization of production and differences in the configuration of models. Please read this instruction carefully and follow the recommendations to make your communication with the moped pleasant and mutually beneficial. We wish you good luck on the roads and enjoy using our products.

Safety precautions:

1. Observe traffic rules and check the moped before starting to move.
2. Do not wear uncomfortable clothing that may affect safety.
3. Wear a helmet.
4. Exhaust gas can adversely affect your health; start the moped in a well-ventilated room.
5. Do not operate with one hand.
6. Sit in the middle of the seat while driving. Sitting at the very end of the seat can lead to the scooter overturning and an accident.

4

7. Easily turn your body when turning, otherwise this may lead to unstable control.

expert22 for <http://rutracker.org>

8. Sharp turning or braking can lead to an accident.

9. Be careful on uneven or damaged surfaces, slow down, relax your wrists and shoulders, and hold the handlebars firmly.

10. Do not park the moped near flammable objects.

11. Never overload the moped and secure transported items well.

ATTENTION:

1. Do not place fabric items between the plastic cover and the engine, this may lead to a fire.

2. Do not carry foreign objects on the moped outside the luggage or rear compartment to avoid damaging the surface of the moped.
